Vandal Damage

Vandalism often involves spray paint on walls, furnishings or spreading obnoxious substances on carpets, floors etc. It is one of the most difficult forms of damage to restore. Prompt action can often minimise the effects of the damage and make restoration more successful.

Hints & Tips

DO – vacuum any damaging glass particles from carpets and upholstery.

DO – save any spray cans or containers to reveal the composition of the inks or paints.

DO – save all fragments from furniture, and art objects for restoration.

DO NOT – attempt to remove any ink, paint or cosmetic stains as they can permanently set if not handled professionally.
